# swiss pearl ®

## Swisspearl Largo Incora
# Stylishly authentic with a natural contrast

The innovative Incora façade panel stands out through a vivid spreading pattern and a uniquely balanced interplay of colors. The high quality of every single panel is apparent in the details of the individualized appearance, which is the result of the balanced spreading technique. The large size façade panels are ideal for anyone who want an out-of-the-ordinary finish but also needs optimum functionality.

The right balance
# Design, colors and formats

During the manufacturing process, the still-moist panels are sprinkled with high-quality granulated marble that gives them a unique and dynamic look. Every Incora panel is one-of-a-kind. The granulate becomes perfectly embedded into the fiber matrix as the panels are pressed. To ensure longevity, in a final step the panels are finished with a transparent high-scratch resistant coating that also serves as protection against weather and UV radiation.
